Summary

Dedicated Junior Software Engineer with 2+ years of experience in Designing, Building, and Maintaining high-performance software applications within enterprise environments. Expert in Javascript, HTML5, and CSS, with a proven track record of Implementing scalable solutions aligned with SDLC principles and shared platforms. Highly proficient in Git and focused on Delivering auditable, maintainable code to meet rigorous functionality standards in data-intensive domains.

Work Experience

Software Engineer Trainee

December 2024 – Present

APTECH COMPUTER EDUCATION, NIGERIA

- Designing and Maintain high-performance algorithms using C++ and Object-Oriented Programming (OOP) to process complex AI risk metrics and governance data.
- Implement SQL-based data persistence strategies and full-stack concepts to ensure frontend scalability and auditable data persistence for enterprise compliance.
- Deliver technical architecture optimizations for shared platforms during class-based projects, ensuring alignment with professional SDLC principles.
- Collaborate on building software solutions that meet GE-level standards for code efficiency and functional reliability within the chosen technology stack.

Python & Backend Developer

January 2024 – Present

INDEPENDENT PROJECTS, REMOTE

- Building automated data extraction and web scraping scripts using Python to aggregate regulatory information for AI governance frameworks like the EU AI Act.
- Designing and Delivering scalable REST and GraphQL APIs to connect frontend governance interfaces with backend data sources, ensuring clean and auditable codebases.
- Implement MongoDB data modeling and persistence solutions to efficiently manage high-stakes risk assessment logs and enterprise-level governance data.
- Process complex JSON and HTML data structures, optimizing the delivery of risk metrics to frontend systems for real-time auditable reporting and maintainability.

Frontend Developer

January 2023 – Present

PERSONAL & SKILL-BASED PROJECTS, REMOTE

- Designing and Implementing responsive, high-performance interfaces using Javascript, HTML5, and CSS to simplify complex regulatory risk metrics.
- Building UI components with a focus on Accessibility and Design Systems, utilizing Storybook for documentation and consistent enterprise branding.
- Maintain high reliability in high-stakes governance data platforms by implementing end-to-end testing with Cypress and version control using Git/GitHub.

- Deliver enterprise-grade scalability and uptime by integrating Docker and CI/CD pipelines to streamline deployment workflows within shared platforms.

Education

Advanced Diploma in Computer Education in Computer Education

December 2024 – Present

APTECH COMPUTER EDUCATION

Additional Skills

Core Web Development: Javascript, HTML5, CSS, AngularJS, EmberJS, BackboneJS, React, Typescript, Tailwind CSS

Backend & Data Engineering: JPA, Hibernate, Spring Data, SQL, MongoDB, Python, C++, REST, GraphQL

Tools & Logic Systems: Git, GitHub, Docker, CI/CD, JRules, Drools, VS Code, Storybook, Cypress

Methodologies & Standards: SDLC, Agile, OOP, Algorithm Design, Accessibility, Design Systems, EU AI Act Compliance
